Proper Disposal of Household Hazardous Wastes

Many products found in homes contain chemical ingredients that are potentially harmful to people and the environment. Chemicals such as oven cleaners, paint removers, bug killers, solvents and drain cleaners are just a few common hazardous products in the home. Over the last 20 years, concern about the disposal of such products has been growing. The City has contracted with Curbside Inc. to help residents dispose of these hazardous materials. Dumping these materials down either the sanitary or storm sewers is illegal and harmful to the environment, as well as your health. There are still 2009 funds available for this program. In most cases you will only have to pay a \$20.00 co pay for the service. If you have an excessive amount of hazardous waste there will be additional charges. Curbside Inc. can be reached at (800) 449-7587, and they will come right to your door to pick up your waste. The City will again be collecting household trash and electronic waste from April 18-26, 2009.
